Version 7.11.2

This document provides information about features, issues that were discovered and fixed since the previous release, and any limitations of the release. It is important that you read this document before you install and configure this version.

For information about how to install and upgrade, see:

- Installation Guide

- ObserveIT Upgrade

For the online documentation, click here.

This release includes security fixes.

Resolved Issues

- ✓ [Issues 411]: The detection of file copy to USB devices has been improved to cover massive amounts of files.
- ✓ [Issue 395]: In the Diaries, when switching from Summary to Timeline view, the loading time has been shortened for sessions with massive file copy.
